

# SMART ONLINE SURVEY SYSTEM

## Introduction

Smart Online Survey System is a web-based application developed to collect feedback from Students, Hospitals, Employees, and Offices. Users can register, log in, submit surveys, and view analytics through charts.

## Objectives

- Collect feedback online.
- Store survey responses securely.
- Analyze responses using charts.
- Provide an easy-to-use interface.

## Technologies Used

- HTML
- CSS
- JavaScript
- Firebase Authentication
- Firebase Firestore
- Chart.js

## Modules

1. User Registration
2. User Login
3. Dashboard
4. Student Survey
5. Hospital Survey
6. Employee Survey
7. Office Survey
8. Analytics Dashboard

## Features

- Secure Login and Registration
- Survey Submission
- Firebase Database Storage
- Pie Chart Analytics
- Bar Chart Analytics
- Responsive Design

## Future Enhancements

- Admin Dashboard
- PDF Report Generation
- Export Responses to Excel
- Email Notifications
- Advanced Analytics

- Multi-Step Survey Forms

## **Conclusion**

The Smart Online Survey System provides an efficient platform for collecting and analyzing feedback. It reduces manual work and helps organizations make data-driven decisions.
